

vortex™

industrial laundry sour

linden series combines high-performance with formulations that preserve the soft feel and fresh scent to all fabrics. High tech solutions to common spot and stain problems allow you to get the most use possible from your linens and fabrics.

vortex is a concentrated liquid sour consisting of a blend of non-corrosive organic acids for the final rinse in the wash cycle to eliminate residual alkalinity. It prevents discoloration and weakening of washed textiles while bringing fabric pH to proper level for safe contact with skin. It is especially useful for tunnel washers where it extends the life of the stainless steel parts.

FEATURES

- Extends life on parts of tunnel washers while being just as effective as conventional sour.
- Concentrated active product that totally neutralizes residual alkalinity in the wash load.
- Cuts rinse water requirements.
- Helps prevent and remove rust stains, removes residual alkalinity, and dissolves hard water deposits on fabric - thereby preventing fabric yellowing, graying and weakening.
- Can be used on white and colored cottons, polyester, woolens and rayons.
- Compatible with fabric softeners, anti-chlors and starches.

OPTIMAL APPLICATIONS

Commercial laundries, hotels, motels, health care facilities, nursing homes and restaurants.

green cove™

BIODEGRADABLE, NON-TOXIC, PHOSPHOROUS FREE

Environmentally Preferred Green Cove products reflect our commitment to protect the environment, operate in a sustainable fashion and deliver products that make a difference for our planet and our customers every day.

PRODUCT SPECIFICATIONS

Physical Description	Clear, liquid
Color	Colorless
Odor	Mild, faint sugary scent
pH (1%)	1.0 - 1.2
Viscosity	Water thin
Flashpoint	None
Weight per Gallon	9.3 lb./gal.
Storage Stability	1 year minimum
D.O.T. Shipping label	None
